FOR IMMEDIATE RELEASE

## Ramsey Announces New General Purpose Winch

(Tulsa, Oklahoma) Ramsey has combined the knowledge of building off-road and wrecker winches to develop the ultimate general-purpose winch.

The new Badger 2500 wireless remote general-purpose winch offers you something no other winch can offer-wireless operation. Now with no wires or cables, one can operate a winch from virtually any position up to 50 ft. away. The Badger also comes with a workhorse motor that uses fewer amps when winching.

Other features include: 50 ft. of aircraft quality wire rope attached at an anchor point in the winch drum for maximum safety and pulling distance, roller fairlead, a high strength clevis hook and the cam-actuated clutch.

The Ramsey reputation for power, strength and dependability lives on in the new general purpose Badger 2500 winch.
