FOR IMMEDIATE RELEASE

Ramsey Announces the NEW Patriot 15000 lbs. Winch

(Tulsa, Oklahoma) The NEW Patriot 15000 winch combines the proven design of our front mount consumer and industrial winch lines and takes it to the next level. The Patriot 15000 has a strong planetary gear system for those applications that require brute strength without sacrificing line speed.

"The Patriot 15000 is a high performance winch for the construction and fleet users that demands the best in performance and quality," says Jeff Ray, National Sales Manager. "In addition, the Patriot 15000 incorporates a new spring loaded clutch design that enables the free spooling and verifies the engagement easily".

The Patriot 15000 has the following specifications and features:

Motors and solenoids are grounded directly to the battery. This eliminates poor grounding that can cause performance failures and damage to the winch. Powerful 5.5 hp 12 V DC motors for increased pulling power. The Patriot 15000 comes with either a 12 ft. wire pendant remote OR the PATENT PENDING WIRELESS REMOTE. Automatic load-holding brake design for strength and reliability. 3-stage planetary gear system for fast line speed. Limited lifetime warranty

For over 50 years, Ramsey Winch has been a leader in the winch industry. Ramsey currently manufactures over 150 winch models for front mount self-recovery and industrial applications. Headquartered in Tulsa, Oklahoma, Ramsey Winch markets their products in more than 85 countries worldwide. Visit us online at [www.ramsey.com](http://www.ramsey.com).
